JMIT

Japan Mongolia IT Consortium

Self Intro

Sura.Kh /SUGARRAGCHAA.KH/

- **JMIT** | Executive Director, 2024 ~
- **Tab Systems Mongolia LLC** | CEO, 2024 ~
- **Rakuten Group, Inc** | Engineering Manager, Engineer, 2017 - 2024
- **Tokyo University of Electro-Communications** | 2013 - 2017
- **Hachinohe-kosen** | 2010 - 2013

Why Japan-Mongolia IT Cooperation Now?

Shared Needs / Shared Opportunities

Japan

- Facing a significant **IT talent shortage** *1
- Interest in digital innovation for **mining, agriculture, and infrastructure** — Mongolia offers unique testing environments

Mongolia

- **Young, growing tech workforce** (median age ~27)
- **IT as a strategic export** for a landlocked economy
- Strong drive toward a **knowledge-based economy**

Synergy Potential *2

Ability to materialize ideas ⟷ Creativity

Perseverance ⟷ Breakthrough power

Reputation ⟷ Solutions

Consistency ⟷ Agility

Methodical approach ⟷ Rapid execution

*1: Japan's Looming Shortage of IT Talent
*2: From AND Global, Khoso's presentation

From Trade to Knowledge

What We've Build So Far

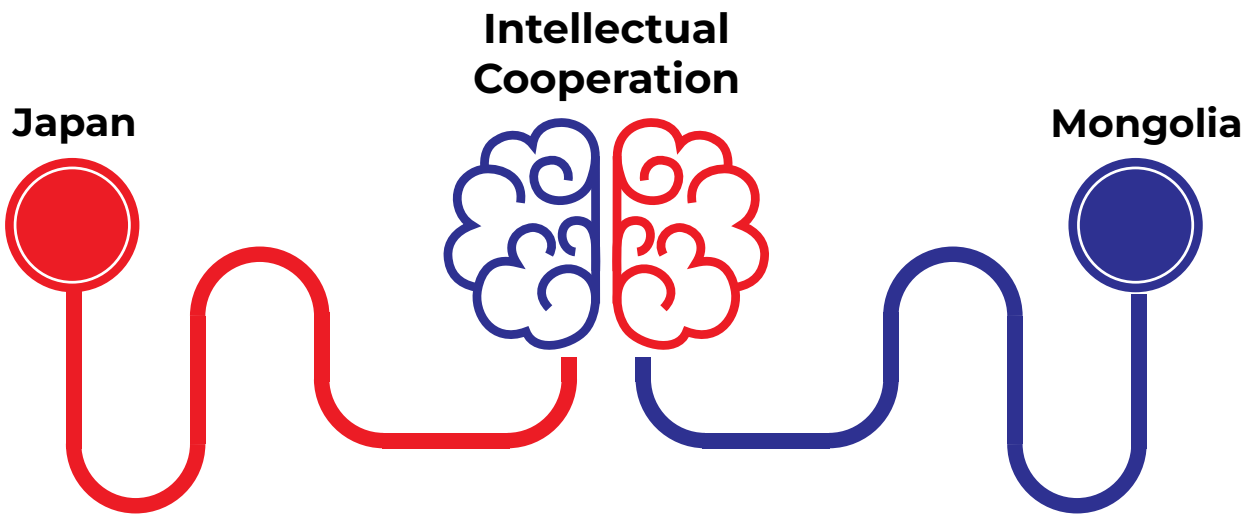
- 2016 Japan-Mongolia Economic Partnership Agreement (EPA)
  - Focused on machinery imports and textile exports
  - Digital services were not addressed
  - Created a foundation of trust and economic structure

Future: Knowledge-Based Collaboration

- Mongolia offers R&D potential in:
  - IT: outsourcing, prototyping, testing, hr dispatching
  - Mining tech: automation, safety systems, environment monitoring
  - Agritech: smart livestock, climate-resilient solutions
  - Green tech: renewable energy infrastructure
  - Fintech

JMIT

JMIT - Purpose



The Japan-Mongolia IT Consortium connects Japan and Mongolia, fostering collaboration between Mongolian IT startups and Japanese companies, aiming to become a core organization in the IT industry and contribute to the growth of Mongolia's startup ecosystem.

JMIT

JMIT - Focus Areas

1. **Joint IT Projects and Programs**
   Study and share the experience of IT companies from Ulaanbaatar and Shinagawa. Support the implementation of joint projects and cross-border programs between enterprises and institutions.
2. **Outsourcing IT Projects**
   Enable Japanese companies to collaborate with skilled Mongolian IT teams, combining technical expertise, reliability, and adaptability. Provide project management and quality assurance support to ensure smooth communication and successful delivery.
3. **Co-Innovation Events**
   Organize joint events in partnership with the City of Ulaanbaatar and Gotanda Valley Association to promote innovation, IT technologies, and business collaboration between Japan and Mongolia.
4. **Digital Nomad Program**
   Provide Japanese companies with access to skilled Mongolian engineers and professionals through remote and freelance team-building opportunities.
5. **Research & Development (R&D)**
   Develop cooperation in science, technology, and innovation. Promote academic and professional exchange, collaborative research, and organize a series of training courses and workshops for designers and programmers.
6. **Startup Acceleration**
   Support Mongolian startup entrepreneurs and collaborate on fostering an innovation-driven culture through mentorship, incubation, and knowledge exchange programs.

JMIT
